Developing Leaders in Science, Technology, Engineering and Mathematics

Mattawan WiredCats is a high school robotics team with approximately 28 students from the Mattawan area. We participate in *FIRST* (For Inspiration and Recognition of Science and Technology) competitions, which is a worldwide non-profit organization dedicated to inspiring students to pursue careers in engineering, computer science, mathematics, science and technical trades. Our program prides itself in being student led and one that encourages innovation, critical analysis, teamwork, time management and leadership. We strive to give students the skills they need to be successful in their future careers through hands-on experiences in competitive robotics.

Invest in the Future

As an all-volunteer, non-profit organization running a high-budget program, we rely on sponsor donations to continue the work we do. By sponsoring our award-winning program, you will not only be investing in the future talent that will be entering the work force, you will also be investing in the local community. Your donation provides the opportunity for students to obtain hands-on experience in design, CAD drawing, CNC machining, electrical circuits, sensors, computer programming, business management, and leadership. Depending on the donation level, sponsors will also get public recognition at regional, state and national competitions, which provide visibility to hundreds of individuals. Donations to the Mattawan WiredCats Robotics Team are tax deductible (non-profit school). See the back for sponsorship levels and benefits.
